

Who we are?

Xperience Plus (X+) is a UK start-up with the offices in London (UK) and Frankfurt am main (Germany), born in November 2019. The project belongs to eXolve Ltd company (UK).

The idea of bringing people the opportunity to explore the world in 5-senses dimension was designed by Fabrizio Gramuglio (CEO), and it's based on his live experience with relatives on wheelchair and following problems of travelling.

Why X+?

The project's MTP is Enabling people to experience unlimited realities which is realized in being the first real-time, interactive, immersive, and on-demand experiences enabler. To deliver that, X+ created a new framework to enable the Media and Broadcasting Industries to stream not only audio and video but indeed any stimuli available, from taste to smell, from touch to temperature.

Products & Solutions

In 2020 X+ app was presented to the audience of beta-testers. X+ connects in real-time users in need to design and direct their own experiences (Dreamers) and users who want to monetize their skills by delivering experiences (Doers). The platform collects and delivers multiple stimuli: smell, touch, taste, audio, and video. X+ is hardware agnostic, multi-channel, and streams in real-time. Additionally, X+ framework and technology can be integrated in pre-recorded video, VR/AR/XR environments, and could support and empower various industries: travelling, sports, music and more.

Acknowledgements

The core team of X+ took part in #EUvsVirus Hackathon being the framework recognized as winner solution for the Cultural and Political Cohesion Domain as the number one solution to support arts and entertainment category.

Social impact

X+ was designed for inclusion and faces needs of modern society applying SDGs (Social Development Goals) to its principles. Our goal is to remove physical, economical, timing, geographical, emotional barriers allowing anyone to live unlimited experiences and realities.

Financial Milestone

X+, moreover, received a seed financial investment of 500.000€, to accelerate the advent of the Internet of Senses.

Executive Team

X+ was born from the vision of professionals and serial entrepreneurs with twenty-years' experience in exponential technologies (AI, blockchain, etc.), business and financial experiences.
